

The Reimagined Office: *Design & Budget Guide*

A new **hybrid workplace** that gives employees
something better to come back to.

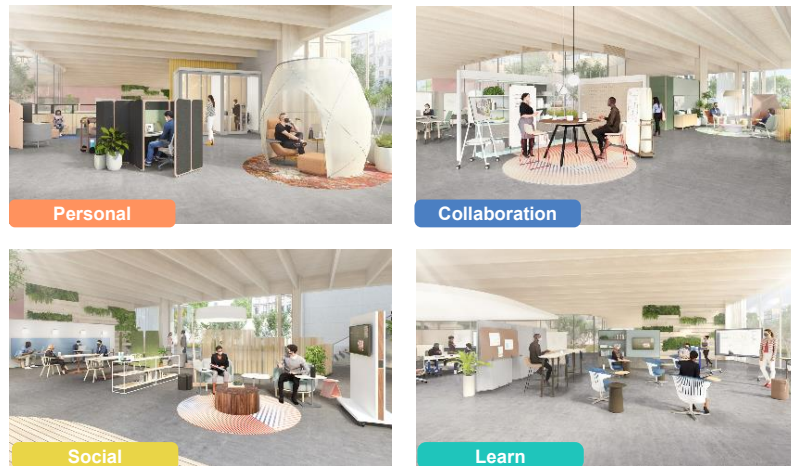

THE REIMAGINED OFFICE: *DESIGN & BUDGET GUIDE*

Introduction

Welcome to The Reimagined Office

COVID has forever changed how we think about both remote and in-person work, creating **new employee expectations**. They are looking for safety, belonging, productivity, comfort, and control.

To support these evolving needs, new design principles and an **ecosystem of spaces** need to be introduced to the work environment to incorporate a balance of four modes of work:

This interactive guide allows you to explore neighborhoods within a reimagined space that gives employees something better to go back to. Each neighborhood provides a different blend of the four work modes and are designed with furniture, technology, and demountable walls.

Who is it for?

This guide is designed to help CEOs, CFOs, CIOs, HR, IT, and facilities experts.

Why is it helpful?

Visualizing the possibilities of a reimagined office is a great first step in planning to refresh or renovate your workplace to engage employees, address new expectations, and help them return to something better.

Is it research-based?

Steelcase and Microsoft research, stats, and facts were our inspiration for the applications, and are foundational to creating safe and compelling workplaces.

Can I tour The Reimagined Office?

Yes! Experience our 3D, self-guided virtual tour of The Reimagined Office that includes the applications in the guide.

[Access the Virtual Tour](#)

THE REIMAGINED OFFICE: *DESIGN & BUDGET GUIDE*

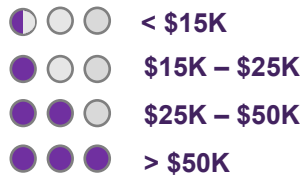

Introduction

How it Works:

This interactive guide showcases full color 3D renderings, functional descriptions and products for each application within different neighborhood settings with primary and supporting modes of work.

Budget:

Each application is coded to provide an installed budget range that includes furniture as well as technology and demountable walls as appropriate.

FLEX CAMP
Research, Facts & Stats

Primary Mode Of Work: Collaboration

Personal Social Collaboration Learn

Flex Camp Neighborhood
This flex camp space is primarily focused on giving teams a flexible and agile environment with user-configurable furniture, technology, and boundary solutions. The adjacent open and enclosed spaces support other types of collaborative experiences.

Fact
Furnishings that easily move, such as mobile whiteboards, digital displays, freestanding privacy screens, and tables or desks on casters allow spaces to expand and contract to support distancing and accommodate individuals and groups of all sizes.

Stat
54%
54% of people want to be able to reconfigure their furniture, yet only 38% of people report being able to do so. This impacts people's physical, cognitive and emotional comfort.
Steelcase Global Future of Work Report Feb. 2021

What Happens Here
Join others in an impromptu team meeting with remote members, shift to the personal flex for some focus time and join a client meeting in the Enclosed Collaboration space.

Neighborhoods are color coded by their primary work modes:

View Highlighted Solutions

Check out these sections for easy to retrofit applications, technology descriptions, and a summary of furniture solutions:

Technology Solutions:

This section summarizes the technology throughout the guide. They are organized by safety/space management, collaboration, and integrated technology.

These include a series of concept spaces that Red Thread has developed to support hybrid collaboration, featuring Microsoft and Logitech technology.

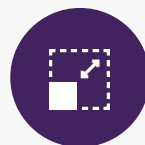

[Jump to Technology Solutions](#)

Furniture Summary:

This section summarizes the furniture settings by space type. They are organized by open and enclosed and include work café, workstations & benching, lounge & casual settings, phone booths and collaboration spaces.

[Jump to Furniture Summary](#)

Retrofit Solutions:

We understand that not everyone is ready for a full renovation, so we've identified the easiest solutions to retrofit within your existing space. These solutions (many with integrated tech) can be implemented easily and affordably within existing floorplans, such as phone booths, meeting pods, huddle rooms, connect rooms, and open collaborative settings.

 ● Collaboration
 ● Learn

What Happens Here

- Welcome guests
- Conduct temperature checks and view occupancy maps
- Socialize with coworkers and participate in casual or impromptu meetings
- Share a meal or host an event

Menu

WorkCafé Neighborhood

The **work café neighborhood** serves as the social hub of the space, welcoming employees and guests. Some of the key features include temperature checks, sanitation stations, live occupancy maps, and an adjacent enclosed guest meeting space.

Fact

Despite efficiency-based arguments for embracing a heavy work-from-home strategy, **people are social beings and do not thrive when they feel alone.** Virtual meetings can't replicate the same level of connection people feel when they are together.

Organizations will need to rethink the purpose of the office from simply a place to work to becoming the **infrastructure for building social capital and fostering a sense of purpose and belonging.**

Stat

73%

Upon return to the office, **73% of employees expect adherence to safety protocols.** Space management software and digital signage can help control capacity levels.

Primary Mode Of Work: Personal

What Happens Here

- Set up at a workstation for heads down work
- Can control visual, acoustical and territorial privacy
- Pop into meeting pod to listen in on a webinar, a large group share-out, or make an impromptu video call with headphones

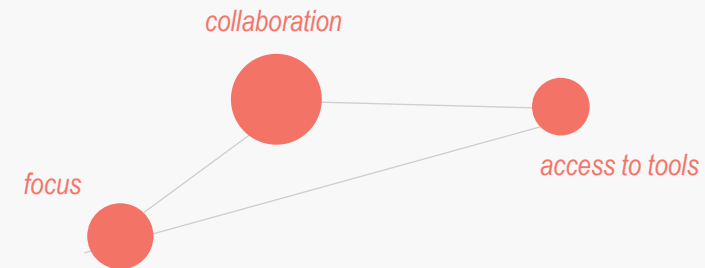

Individual Focus Neighborhood

The **individual focus neighborhood** considers all individual diverse needs and workstyles, supporting personal and focus work to increase productivity.

Fact

Employees **express a need for the office to provide places to focus** because their home environment is distracting and less likely to be the same size or have the same amenities, such as a desk, ergonomic chair, and secondary monitor.

Stat

When asked **what they want most in their office going forward**, people surveyed in the U.S. ranked focus, access to tools, and collaboration the highest.

Primary Mode Of Work: Learn

What Happens Here

- Collaborate in the scrum room designed with flexibility in mind and an emphasis on virtual participants
- Adjust furniture on demand to allow everyone to be seen and heard
- Attend large group trainings or small group sessions
- Use Broadcast Studio to host virtual town halls

Menu

Flex Scrum Neighborhood

The **flex scrum neighborhood** supports learning and agile collaboration through a variety of settings. From large group trainings to small group creative workflow, the scrum room provides an easily reconfigurable flexible environment that can adopt to a fixed or fluid setting.

Fact

Moving forward, **people will want the same level of flexibility in their places of work as they have at home.** This can be accomplished by giving employees choice and control over where they work and learn while in the office.

Stat

87%

87% of business leaders plan to allow more flexibility around how, when and where people work. Providing multi-modal spaces will be crucial to bringing employees back to the workplace.

Research, Facts & Stats

Primary Mode Of Work: Personal

What Happens Here

- Join meetings in huddle room, engaging hybrid teammates with multiple displays and cameras
- Quickly switch between individual and group tasks
- Access personal spaces that minimize disruptions from video meetings
- Transition from private calls in the phone booth to open conversations in the lounge

Menu

Nomadic Camp Neighborhood

This **nomadic camp neighborhood** supports choice and control as workers can transition between focused to collaborative work through a combination of individual spaces and enclosed meeting rooms. When it's time to collaborate with off-site team members, the enclosed web conferencing rooms provide a better, more equitable experience for all participants.

Fact

Creative work, solving complex problems and innovation all **require an ebb and flow between “me” and “we” work**, which means the workplace must provide spaces for both that make it easy to transition between the different work modes.

Stat

41%

When considering productivity and engagement, **41% of workers globally are not satisfied with their work from home experience.** The workplace must provide places where people can work together, as well as places where they can do individual, focused work.

Research, Facts & Stats

Primary Mode Of Work: Collaboration

What Happens Here

- Join meetings in huddle room, engaging hybrid teammates with multiple displays and cameras
- Quickly switch between individual and group tasks
- Access personal spaces that minimize disruptions from video meetings
- Transition from private calls in the phone booth to open conversations in the lounge

Nomadic Camp Neighborhood

This **nomadic camp neighborhood** supports choice and control as workers can transition between focused to collaborative work through a combination of individual spaces and enclosed meeting rooms. When it's time to collaborate with off-site team members, the enclosed web conferencing rooms provide a better, more equitable experience for all participants.

Fact

Creative work, solving complex problems and innovation all **require an ebb and flow between "me" and "we" work**, which means the workplace must provide spaces for both that make it easy to transition between the different work modes.

Stat

41%

When considering productivity and engagement, **41% of workers globally are not satisfied with their work from home experience.** The workplace must provide places where people can work together, as well as places where they can do individual, focused work.

Steelcase Global Future of Work Report Feb. 2021

Primary Mode Of Work: Collaboration

What Happens Here

- Open flex collaboration designed with flexibility in mind
- Adjust furniture on demand to allow everyone to be seen and heard
- Head to Steelcase tent for on-demand privacy in the open plan
- Open or enclosed spaces engage hybrid teammates with multiple displays and cameras

Menu

Open Scrum Neighborhood

This flex **open scrum** space is primarily focused on giving teams a flexible and agile environment with user-configurable furniture, technology, and boundary solutions. The adjacent open and enclosed spaces support other types of collaborative experiences.

Fact

Furnishings that easily move, such as mobile whiteboards, digital displays, freestanding privacy screens, and tables or desks on casters **allow spaces to expand and contract** to support distancing and accommodate individuals and groups of all sizes.

Stat

54%

54% of people want to be able to reconfigure their furniture, yet only 38% of people report being able to do so. This impacts people's physical, cognitive and emotional comfort.

Research, Stats & Facts

Primary Mode Of Work: Personal

What Happens Here

- Collaborate with remote colleagues in either the Broadcast Studio or Pitch Room
- Support individual and group video interactions that are not constrained to laptops or phones.
- Access personal spaces that minimize disruptions from video meetings
- Transition from focus work in personal seating to large group meetings in the team project space

Menu

Nomadic Personal Camp Neighborhood

This **nomadic camp** attracts workers returning to the office by braiding digital and physical experiences to easily connect with team members in-person or remote. The Pitch Room and Broadcast Studio are unique and dynamic spaces that provide new ways of collaborating. However, this neighborhood is also comprised of individual spaces for focused work near meeting room environments.

Fact

The need to accommodate remote participation through technology will become the norm, as people travel less, and clients and collaborators continue to work remotely.

Stat

72%

Technology integration is more critical than ever before as **72% of companies expect to adopt a hybrid work model** moving forward.

TECHNOLOGY SOLUTIONS:

Safety & Space Management

This section summarizes the technology throughout the guide.

Paramont Terminal

Paramont Terminal

Conducts rapid secession temperature checks on visitors prior to entry. It offers real-time face mask detection.

PurifySpaces by Red Thread

PurifySpaces by Red Thread

This air purification system kills airborne pathogens, including MS2, a SARS-CoV-2 surrogate virus. The germicidal UV light reaction chamber returns pure air into the environment.

Spaceti

Spaceti

This reservation system allows employees to book workspaces, meeting rooms and even parking spaces. Live maps identify less dense places to work, air quality dashboard monitors CO2 levels, and occupancy analytics determine space utilization.

RoomWizard

RoomWizard

This room reservation system ensures you have a space reserved for your meetings. You can reserve impromptu meetings ad-hoc, provide equal access to and timely turnover of spaces, and manage space usage to make data-driven decisions.

Menu

Collaboration Technology

Microsoft Surface Hub 2S

50" and 85" Microsoft Surface Hub 2S

Employees will love the simplicity of the Microsoft Surface Hub 2S, a powerful all-in-one integrated solution for team collaboration. It has interactive touch and built-in Microsoft Teams, camera, microphone array, speakers, wireless Miracast display and Windows 10.

Steelcase Roam Cart

Steelcase Roam Cart and Optional Wireless Battery

For the 50" Surface Hub 2s, Steelcase Roam Cart moves easily on smooth-rolling casters for on-the-go transitions throughout any space. Locking casters provide added stability and safety. The mobile stand was thoughtfully designed to help teams work effectively. The optional wireless battery makes any open plan collaboration possible.

Logitech Tap Room System

Logitech Tap Room System Single or Dual Display

This Meeting room supports Microsoft Teams, Zoom and other web conferencing platforms. Solution includes a camera/microphone/speaker sound bar and a one touch join controller with calendar integration, instant content sharing, and always-on readiness.

Coordinated Join allows Teams Room + a Microsoft Surface Hub 2s to join the same meeting (up to 3 displays)

Barco ClickShare

Barco ClickShare CS-100 Conference

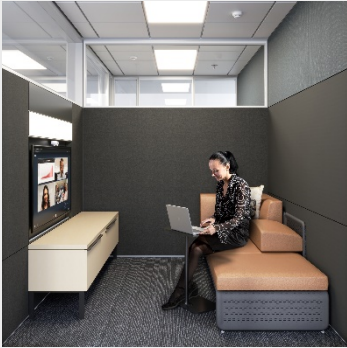

To avoid wiring and keep things flexible, the Barco ClickShare allows users to share computer or mobile device content onto a display device on the fly. Up to eight users can join in wirelessly, with one ClickShare system.

Pitch Room

Connect Rooms

When you are in the office, you need a quiet place to conduct a web conferencing meeting. These private spaces have optimal acoustics and lighting necessary for a professional interaction.

Connect rooms are Microsoft and Zoom compatible and incorporate a range of technology.

- 43" and 55" displays with Logitech Web Conferencing
- 50" Microsoft Surface Hub2s
- BYOD solutions to connect your web conferencing enabled laptop and view meeting on a 37" Adjustable desktop monitor.

To give employees seating choices, these connections are designed with four different postures: standing, perching, seating, and lounge settings.

The Pitch Room

When you and your team are delivering an important presentation to a client or investor, the Pitch Room is the next best thing to being there.

This space was designed for an immersive experience for a remote client by maximizing the visibility and interaction of all participants. The dual zone presentation space allows the presenter and team to be seen simultaneously through two dedicated cameras along with content sharing. The cameras, lighting, collaboration chat and poll features and whiteboards are all capabilities to create the most dynamic pitch.

TECHNOLOGY SOLUTIONS: Integrated Applications

Broadcast Studio:
Interactive Whiteboard

Broadcast Studio:
Green Screen

Broadcast Studio:
Transparent Whiteboard

The Broadcast Studio by Red Thread

The Broadcast Studio is the first of its kind, delivering a more engaging experience for remote audiences. Executives and organizational leaders need a way to deliver a professional enterprise-wide or 1 to many presentation with optimal studio lighting and acoustics.

This unique broadcast studio creates an immersive experience for remote participants with the use of high-resolution cameras, and custom views of both the presenter and content. Features like “raising your hand,” emojis, chat and polling allow everyone to participate equally. Presenters view the meeting participants and content on a single or dual wall-mounted displays.

The Broadcast Studio is offered in three styles:

- **Interactive Whiteboard**
The presenter uses a 50" Microsoft Surface Hub 2S to annotate and control content.
- **Green Screen**
The presenter creates immersive experiences by selecting their own digital backgrounds.
- **Transparent Whiteboard**
When the presenter is writing on a traditional whiteboard, the view is blocked by the presenter. An additional camera above the whiteboard captures and transposes content on the whiteboard over video to maintain visibility of the content.

TECHNOLOGY SOLUTIONS:

Integrated Applications

Collaboration Nest

Collaboration Nest

Creating an equitable experience for local and remote participants means giving everyone, no matter where they work, the ability to see and hear everyone. In a typical meeting room configuration, local participants, when conversing with others within the room, turn away from the camera, causing remote participants to lose eye contact.

The Collaboration Nest incorporates a 360-degree cameras at the center of a four-sided console with 4 integrated displays. Each in-person participant can see remote participants on their console display and the other local meeting attendees. The remote participants have a better experience because with better sightlines, the far end can maintain eye contact and experience the meeting in a natural way

The Collaboration Nest is available in the open plan solution (as shown here) or an enclosed meeting environment. Since the console is luggable, it can be situated on a square conference room table as an alternative.

Video Wall

Video Wall - Presentation and Conferencing System

The 109" Video wall is the perfect focal point for your WorkCafé, which can double as a social hub and event space. Throughout the day, the video wall system can display a customized digital signage content, entertain employees with the baseball game, or be used to deliver a presentation to a large group. With integrated web conferencing, cameras and microphones, this system can have employees or guests join the meeting or event.

A modern office interior. In the foreground, a woman with dark hair, wearing a blue short-sleeved shirt and black pants, is seated at a white circular table, writing on a tablet. She is sitting on a yellow and white chair. The wall behind her is made of horizontal wooden planks. To the left, a wall is covered with many small, colorful photographs. In the background, a man in a light blue shirt and dark pants is standing and talking to a woman in a grey blazer and black pants. They are near a whiteboard. The office has a glass partition with a black frame. The wall behind the man and woman is a solid blue color. There are modern office chairs and a small potted plant on a table. The floor is covered with a grey carpet. The overall atmosphere is professional and modern.

[Workplace transformation](#) is the rethinking of workspaces to meet evolving work styles and technology for a new hybrid workplace. It's what's going to attract your employees back to the office, fuel innovation and creativity, and foster connections to strengthen your workplace culture. It's creating flexible spaces that deliver an equitable experience for everyone, no matter where they are working. It's providing a variety of different work modes through the day for focusing, collaborating, learning and socializing. And it's thoughtfully integrating [furniture](#), [technology](#) and [architectural systems](#) to bring all the elements together.

[illegible]

To receive a tailored budget for your project, please [reach out to us](#) to be connected with a workplace consultant.
